ISO ISO/IEC 27001 HIPAA PCI NIST

**URS Breach Plan Connect** guides a client through an online process to *build* their own ***data breach incident response crisis plan***. It's easy and done in minutes!

Studies have also shown many organizations are lacking a breach readiness plan.

- **Plug-n-Play Data Breach Plan:** Development of a custom *data breach response plan*. ***Done in minutes!***
  An online step-by-step guided process that allows the client to have their own customized data breach crisis response plan. They can then print it etc.

- **Fast Access, from Anywhere**: URS BPC provides fast & secure access to your data breach crisis plan from anywhere when needed. The client's management team will have instant (24x7) access from their mobile/ desktop device to their data breach crisis plan once a systems data breach type of an event unfolds (especially important since many system/ data breach incidents happen in off-hours or weekends and time is of the essence to respond without panic).

- **'URS Team' Breach Expert Recommendations:** As part of the guided plan setup process, we can offer access & assistance to external technical breach response experts (computer forensics, etc.) who can be included in the client's URS BPC crisis plan as their external 'URS team'.

  This includes a ***Breach Coach*** lawyer for a free first call and optional oversight and hands on legal assistance to guide the client through recovery and compliance hurdles. URS BPC can also be pre-configured to include any breach expert(s) that the client is most comfortable with.

Our URS BPC platform will then secure-host the client's plan, so it is *actionable*, and the client can access it on-demand, at any time *(a key benefit since many crisis events happen off hours).*

---

*The Breach Plan Connect is included in the URS Platinum Subscription*

---

*A strong Cybersecurity Program is much more than just a firewall and antivirus!*

Why is having a breach plan vital? Regulators (state AGs), partners, cyber risk insurers & the legal community are increasingly asking (requiring) organizations to demonstrate that they have a data breach preparedness plan in place.

---

## Key Features

- Mobile-friendly Platform – Access your plan at any time, from anywhere, on any device.
- Hosted Service – Access your plan even when your organization's systems are compromised or inoperable.
- Scheduled Reminders – Receive emails reminding you to review and test your plan.
- Free Cyber Risk Assessment Survey – Evaluate and benchmark your privacy and security practices.
