

Ultimate **Risk** Services

SAVINGS THRU SAFETY & SECURITY

The URS Security Policies are **comprehensive**, easy-to-edit, and instantly generated using our Instant Policy Creation, our standard policy product includes all of the IT policies your company will need.

We designed this policy solution because our clients:

- Need to meet specific **compliance** requirements or regulations
- Have advanced or comprehensive IT security or documentation needs
- Need a **template** they can put in place immediately
- Require the essential Network Security Policy and Confidential Data Policy
- Desire Word compatible documents they can edit as they wish
- Use the IT Security Forms to assist them in policy implementation

We are confident our Policy offering represents the highest value IT security policies available today. Companies ranging from 50,000 employees to as few as five employees currently use our data security policies.

Our Security Policies Product is:

- A **Fully editable** IT policy document
- Written according to C-I-A triad of Confidentiality, Integrity, and Availability
- Customized to meet your corporate, compliance, or **industry requirements**
- Immediately available using our template-based Instant Creation Wizard
- Cost-efficient compared to the price of doing it yourself

You will also receive our policy forms to help you implement your **customized** security policy templates. This IT Policy Product gives you the following policies:
