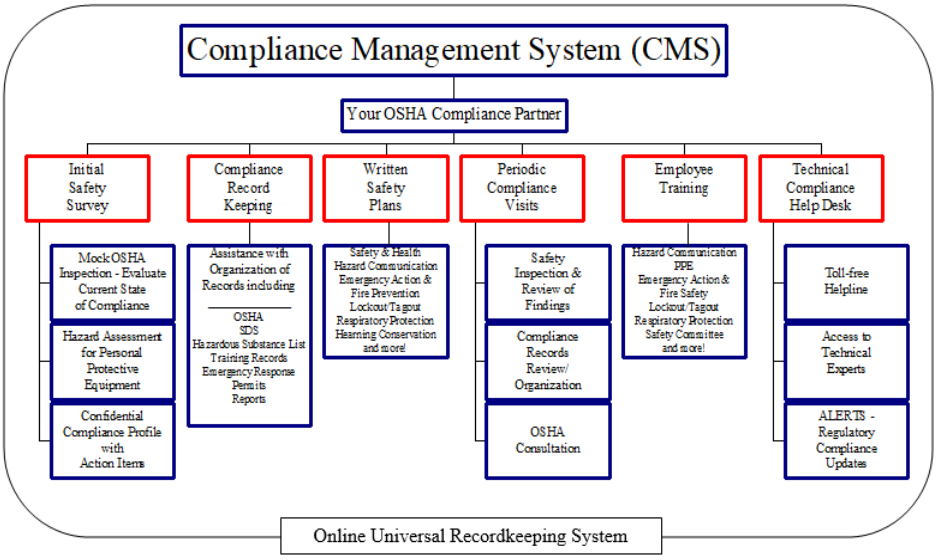
Compliance Management System (CMS) Safety Program

ACS offers a comprehensive compliance program, called the Compliance Management System (CMS) Safety Program, which is designed to help business owners who can't justify the expense of a full-time safety person but need help with recordkeeping, training and other OSHA requirements. By taking a proactive approach with our **CMS Safety Program**, companies have reported saving money by reducing lost workdays and avoiding OSHA fines. More importantly, you can protect your work force from needless accidents and injuries.

Whether you need a comprehensive Loss Control & Safety Compliance Program or assistance with your existing one, with the CMS you can build an effective program.



Our purpose is to help you reach your goals for a safe and compliant workplace, and then help you maintain that level in the years to come.

- Initial Safety Survey
- Safety Inspections
- Employee Training
- Lending Library
- Review and Update Written Safety Plans
- Online Recordkeeping
- OSHA Consultation & Support
- Other Support Services

To get additional information on ACS' **CMS Safety Program**, other safety and health services, or to see how our solutions meet your needs, please contact us @ 800-55-HELPS or visit our website @ www.acs-safety.com.

The ACS "CMS" is essentially an out-sourced safety department.

Benefits of CMS Safety Program

- Reduce the frequency and severity of accidents
- Lower insurance premiums
- Increase productivity

CMS 5 Step Approach
